

National Park Service is the responsible federal agency.

The Draft General Management Plan/Environmental Impact Statement will be on public review from April 15, 1996 to June 14, 1996. The document will be on a sixty-day comment period. Copies of the plan will be distributed to cooperating agencies, interest groups, interested individuals and institutions, and local libraries. The plan will also be available at the administrative offices at Castle Clinton, Federal Hall and General Grant National Memorials, and Saint Paul's Church and Theodore Roosevelt Birthplace National Historic Sites, New York.

The document proposes and analyses alternatives for the future management and use for 5 of the 6 units within the Manhattan Sites which includes Castle Clinton National Monument, Federal Hall and General Grant National Memorials, and Saint Paul's Church and Theodore Roosevelt Birthplace National Historic Sites, New York and Westchester Counties, New York. The plan presents the alternatives for each site individually, addresses planning issues, and it includes resource preservation and provisions for visitor services. Once approved, the final plan will guide the management of the sites for fifteen to twenty years. A separate General Management Plan/Environmental Impact Statement was previously completed for the remaining unit, Hamilton Grange, in January 1995.

The National Park Service will conduct public meeting(s) during the sixty-day period and will advertise the meeting(s) in local media outlets. The purpose of these meetings is to discuss the draft plan and its environmental impact statement. Verbal and written comments on the plan/EIS will be accepted until June 14, 1996.

**SUPPLEMENTARY INFORMATION:** The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta system are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort, the CALFED Bay-Delta Program (Program), is being carried out under the policy direction of CALFED. The CALFED Bay-Delta Program is exploring and developing a long-term solution for a cooperative planning process that will determine the most appropriate strategy and actions necessary to improve water quality, restore health to the Bay-Delta ecosystem provide for a variety of beneficial uses, and minimize Bay-Delta system vulnerability. A group of citizen advisors representing California's agricultural, environmental, urban, business, fishing, and other interests who have a stake in finding long term solutions for the problems affecting the Bay-Delta System has been chartered under the Federal Advisory Committee Act (FACA) as the Bay-Delta Advisory Council (BDAC) to advise CALFED on
